1.1 Brand Brief

BRAND

Positioned around “main character energy”
Trend-driven, youth-focused

PRODUCT

Laces, charms, pins, sneaker chains
Designed for customization
Presented as individual items and minimal sets

AUDIENCE

Style-conscious teens and young adults
Fashion as self-expression

EXPERIENCE

Existing e-commerce site
Standard browsing structure

SYSTEM GAP

Expression defined at brand level
Customization exists at product level
Not translated into experience

2.1 Research

Research Scope:
Stakeholder Research
User Research
Competitive Analysis

BRAND EXPRESSION

Expression communicated through tone and messaging
Limited translation into a consistent visual system

PRODUCT OFFERING

Wide range of accessories
Strong expressive potential
Mismatch between product style, brand direction, and target audience

E-COMMERCE STRUCTURE

Standard product-based browsing
Items displayed individually
No system for building or visualizing combinations

USER INTERACTION

Browsing over creating
Limited guidance or inspiration

KEY INSIGHT

Customization exists,
but not as a guided or cohesive experience

OPPORTUNITY

Reframe customization as the primary interaction,
not a secondary feature

2.2 Repositioning

From decorating sneakers
to constructing identity

Accessory-based products →
Modular styling system

Item-based browsing →
Combination-driven
experience

Implied customization →
Structured customization
system

NEW POSITIONING

Self-expression through modular customization,
where each product functions as part of a larger
system

CORE IDEA

Styling becomes an active process
Users assemble, layer, and combine elements to
construct their look
The focus shifts from selecting finished products to
building personal configurations

DESIGN PRINCIPLE

Customization is the primary interaction, not a
secondary feature
Products are no longer standalone items but
components within a cohesive system

OUTCOME

A unified direction where brand,
product structure, and interface all
reinforce self-expression through
construction

2.3 Target Audience

PRIMARY AUDIENCE

Style-conscious teens
Digitally native, visually driven

MINDSET

View fashion as a form of self-expression
Value individuality over uniform trends
Prefer constructing a personal style rather than following one

BEHAVIOR

Actively mix and match elements across outfits
Draw inspiration from social media and streetwear culture
Engage with products through visual exploration

NEEDS

Tools to experiment with styling
Clear ways to combine and layer products
A system that supports expression

SYSTEM GAP

Support users in building their own configurations
instead of choosing from predefined options

2.4 Persona

Persona 1

Maya

15-year-old | High school freshman | Houston TX
"I just want to look like I have my life together."

Motivation	Feel put-together and noticed for the details
Discovers Things via	TikTok, Pinterest
Shops on	Phone, impulse-driven
Budget	\$10-40
Decides based on	Looks good in photos, easy to style, trend-relevant

Persona 2

Chloe

22-year-old | Recent graduate | Atlanta GA
"I'm done buying things I don't actually love."

Motivation	To build a consistent, personal style
Discovers Things via	Instagram, word of mouth
Shops on	Phone + laptop, research-driven
Budget	\$50+
Decides based on	Quality, versatility, brand authenticity

3.1 Product System

Products are reorganized into a tiered system based on level of engagement and customization

1 / INDIVIDUAL PRODUCTS

Low commitment entry points
Used as add-ons within a larger system

- Shoelaces, charms, bows
- Flexible, mixable components

2 / CURATED SETS

Pre-designed combinations
For faster selection and themed styling

- Bundled by aesthetic or occasion
- Introduces combination logic

3 / CUSTOMIZABLE SETS

Core product offering
Users select and combine elements
To build their own configuration

- Multiple build levels (5, 10, full set)
- Products function as modular parts

4 / MYSTERY SETS

Exploratory and low-friction entry

- Randomized or themed selections
- Encourages discovery and trial

3.2 Selling Model

MULTI-ENTRY SYSTEM

Users can enter at different levels of intent

- Individual products → low commitment
- Curated sets → guided selection
- Surprise sets → exploratory entry

VALUE PROGRESSION

The system encourages movement toward higher engagement

1. From single items
2. to set
3. to customizable configurations

CONVERSION STRATEGY

Customization drives increased value

- Bundling increases order value
- Building sets increases engagement
- Personalization strengthens purchase intent

SYSTEM ROLE

Each tier serves a distinct function

- Individual → entry and add-ons
- Curated → direction and ease
- Customizable → core experience
- Surprise → discovery and variation

3.3 User Flow

A – Browse to Purchase

B – Customization Charm Builder

4.1.1 Overview

Soleluxe designs accessories that transform how sneakers look and feel. Accessories are treated as a form of self-expression.

Rooted in performance culture, styling is framed as an active process. Each look is built through choice, from subtle additions to layered combinations.

Products function as modular elements within a system, allowing users to assemble and construct their own configurations.

4.1.2 Mission

To enable self-expression through modular sneaker accessories.

Solelux provides tools for styling, allowing users to construct their look through individual elements and layered combinations.

4.1.3 Tone of Voice

Clear
Confident
Playful
Expressive
Direct

Soleluxe speaks with clarity and confidence, while maintaining a sense of energy and individuality.

The tone is direct and easy to understand, with moments of playfulness that reflect the brand’s focus on styling and self-expression.

4.2.1 Logo

Soleluxe logo is a custom script mark built around the idea of shoelaces as a form of expression.

The letterforms “l” and “x” extend into a continuous line, forming a lace that moves fluidly through the wordmark.

Decorative elements, including the bow, star, and flower, function as shoelace charms, referencing the brand’s products.

4.2.2 Color Palette

Solelux color palette draws from the visual language of cheer and performance environments.

Pink reflects the energy and presence of performance uniforms, while green references the field as a grounding surface.

Supporting tones are derived from lace and fabric materials, providing a soft, neutral base that allows color and detail to stand out.

RESIN PINK	COTTON CREAM	VARSITY PINK	FIELD GREEN	LACE WHITE
#AC2152 172, 33, 82 0, 81, 52, 33	#F3E8D0 243, 232, 208 0, 5, 14, 5	#AC2152 239, 146, 179 0, 39, 25, 6	#084C30 8, 76, 48 89, 0, 37, 70	#FFFFFF 255, 255, 255 0, 0, 0, 0
80%	80%	80%	80%	
60%	60%	60%	60%	
40%	40%	40%	40%	
20%	20%	20%	20%	

4.2.3 Typography

Typography reflects Solelux’s balance of expression and control.

Headings use subtly rounded forms to introduce softness and character, and the body typeface remains restrained and highly legible for clarity.

HEADING

Build Your Look

League Spartan Bold

Tracking: +0.02em

Leading: 100%

SUBHEADING

Charms, laces, and details shape how sneakers look and feel.

League Spartan Medium

Leading: 0em

Tracking: 110%

BODY

Solelux designs accessories for styling sneakers through small, intentional changes. Each piece can be arranged, layered, or replaced. There is no fixed way to wear them. The result is personal and built through detail.

Tajawal Regular

Leading: 0em

Tracking: 130%

4.2.4 Patterns

Soleluxe patterns extend the brand through a system of charms and graphic elements, referencing the decorative language of shoelaces and accessories.

STAR PATTERN (website)

CHARM PATTERN (packaging)

4.2.5 Imagery

Soleluxe imagery centers on styling as an act of expression.

Shoes are shown in moments of interaction, emphasizing customization through small details such as laces and charms.

Product images are presented on transparent backgrounds to maintain clarity and consistency across e-commerce applications.

4.3.1 Components

UI components translate the Solelux identity into interactive elements, balancing clarity, structure, and expression.

5.3.1 Limited Editions & Archives

Behavior Strategy

Encourages consistent return through daily refresh

Introduces variation and discovery through personalized results

Creates social curiosity and comparison between users

Maintains exclusivity without restricting total inventory

All products are stored within the **Archive**, organized into **four rarity levels**, represented by a **four-leaf clover icon**.

Each day at **6 PM**, four products are randomly surfaced on the homepage. The selection is **personalized**, allowing each user to encounter a different set of products.

Product availability is structured through time. Special series and editions are released within defined time windows, while the daily refresh continues to surface a rotating selection, including items from limited releases.

5.3.2 Customization

Customization is a **central** feature of the SoleLuxe experience.

Research indicates a growing preference among younger audiences for brands that emphasize identity, self-awareness, and individuality. This shift highlights the importance of enabling personal expression through products and interaction.

In response, the project establishes customization as a core UX and product strategy, structuring both the system and experience around the ability to mix, match, and build a personal style.

Customizable Sets	Product type	Details	Price	Orig	Notes
Main brand feature, personalization, higher AOV	Charm set	3 hanging charms	\$20	\$24	Entry point, low commitment, small visible change
	Build Your Set				
	Build 5	5 shoelace charms	\$22	\$25	
	Build 10	10 shoelace charms	\$40	\$50	
	Full style set	10 shoelace charms + 1 premium bow + 1 lace + 2 hanging charms	\$89	\$121	Complete styling system.

5.3.3 Playful Interface

ENGAGEMENT STRATEGY

To increase engagement and time spent on the site, the experience introduces more interaction, playfulness, and immediate feedback.

VISUAL TONE

A softer, more playful visual language is introduced through rounded forms and approachable elements, making the experience feel more welcoming.

INTERACTION DESIGN

The interface uses hover states and micro-interactions to provide quick, responsive feedback, encouraging exploration and continuous browsing.

FEATURE IMPLEMENTATION

The Best Seller section incorporates varied interaction patterns to create a more dynamic and engaging browsing experience.

5.3.4 Mystery Box

Mystery box culture is highly popular among younger audiences, as seen in trends such as Labubu.

This strategy introduces an element of surprise and collectability, encouraging exploration and increasing shareability among the target audience.

Product type	Details	Price	Orig
Mini Surprise			
hanging charm		\$5	\$8
shoelace charm		\$2	\$5
bow	small beaded bow/lace bow	\$8	\$10-12
Surprise Set	5-7 mixed items (shoelace charms, hanging charms, occasional small bow)	\$28	\$35-50
Themed surprise set	5-7 shoelace charms + 2-3 charms/bow	\$35	\$45-60

6.0

Usability Testing Insights

The current experience is **interaction-driven**, while users expect a **trust-first, product-first experience**.

Design optimizes for novelty and interaction, while users optimize for clarity, trust, and efficiency.

1 / Trust signals are insufficient

- Users actively searched for shipping, returns, and product assurance info.
- Missing or weak trust messaging reduced **purchase confidence**.
- Current design fails to establish credibility early in the journey.

2 / Over-reliance on interaction

- Product information is hidden behind hover / interaction-heavy UI.
- **Users expect immediate visibility of products without effort.**
- Interaction pattern creates friction instead of engagement.
- Users want to **scan product variety quickly before engaging deeper**.

3 / “Best Seller”

- Sales-driven labels are associated with platforms like Amazon.
- Independent brands are evaluated on **identity, quality, and trust—not volume**.

4 / Current Mega Menu

- Navigation lacks convention.
- Current mega menu **does not follow standard e-commerce mental model**.
- Users need to “learn” the interface instead of navigating intuitively.

6.1 Our Next Step

Re-align the experience to support:

- **Trust formation**
- **Efficient product discovery**

Align IA with accessory-based browsing behavior.

Study how collections & storytelling drive emotional purchase decisions.

1 / Refocus Market Research

- Shift from sportswear → accessory & feminine brands.

Previous benchmark (e.g. Nike)

→ Optimized for performance categorization

New benchmark:

- SKIMS, Swarovski.

2 / Redesign Mega Menu

3 / Restructure Homepage IA

- Increase immediate product exposure.
- Replace interaction-heavy sections with scannable layouts.
- Introduce **Bundle and Series** as categories entrance.

4 / Strengthen Trust Badge System

- Add visible review section to reinforce **peer validation**.
- Expand messaging to include: Shipping clarity, Return policy, Quality assurance, Community / brand credibility.

5 / Refine Customization Experience

- Improve UI clarity and feedback in customization flow.
- Ensure interaction supports control + clarity, not confusion.
